

# HOW TO USE THE PUMPKIN STENCIL:

1. Cut a circle around the stem of the pumpkin, remove top, and take out all of the seeds and innards.
2. Tape the paper stencil to the pumpkin, then score the design onto the pumpkin using sharp tool like a nail to punch holes along the stencil lines in order to transfer the pattern.
3. With a sharp serrated knife, cut out the design using the punched holes as a guide then remove the cut pieces.
4. Enjoy your pumpkin!
